Greenpower Capital announces new Mega-Solar Project

Solar Park to be built in Ishinade, Osato-cho, Miyagi

Tokyo, Japan/7 October, 2014

Greenpower Capital LLC (GPC) (HQ, California, U.S.A. CEO, Dick Talbert, Tokyo office: Chiyoda-ku, Tokyo) has announced a new project to finish construction in early 2015.

“We are very happy to have the 2 MW Ishinade project built by early 2015”

Michiaki Takasaski, President of Greenpower Capital Japan, said “we have been working with GK Ishinade Mega Solar Power Station for about a year to arrange landowner lease agreements, EPC design, final approvals including non-Agricultural land certification, construction financing and final grid application with Tohoku Power. We are very happy to have the 2MW Ishinade project built by early 2015.”

“We are targeting to build 300 MW of Solar PV in Japan with the METI FiT program.”

Jeff Butler, President of Greenpower Capital, stated “We have come a long way since opening our Tokyo office in 2012. We have been partnering with local landowners and developers to fund and develop projects, as well as arrange construction with our Japanese EPC partners. Finally, Operation and Maintenance services, insurance and other necessary components to operate the solar parks are also provided by local companies. I believe that this partnership model between us and Japanese stakeholders has been mutually beneficial for all of us. We are targeting to build 300MW of Solar PV in Japan with the METI FiT program.”

About Greenpower Capital

GPC is based in Los Angeles with offices in Canada and Japan and focuses on project development, finance and M&A for solar and wind projects in Japan, North and South America, the Caribbean Islands and Europe. GPC's principals have developed large-scale solar projects in multiple countries.

JAPAN

GPC's Tokyo offices are located in the Marunouchi District, with a bi-lingual staff of 7 business development and technical professionals. GPC has the flexibility to partner with local developers and landowners to fund and develop projects. Along with its EPC and Investor Alliance Partners, GPC can provide the entire value chain from initial site selection through the development, legal, financing, construction, and final project sale process.
